

My husband and I were very leery about seeking counsel since it was our first time in doing so. However, we have been more than pleased with Lisa Meyers, and the progress that we have made in the short time that we have been seeing her. She is very personable, professional, knowledgeable and full of insight. We highly recommend her to anyone seeking counsel. She has helped us to see things in a different and new perspective and has helped us grow as individuals and as a couple. In addition, she has helped us along in our journey by opening our eyes to the fact that there is hope and that tomorrow is a new day with new possibilities. We are reaping the benefits from her counsel and our accomplishments.

The staff of the Young & Rubicam Support Group and staff of the American Stroke Foundation we thank you for your very interesting and engaging session on "Recovery After Stroke." I was a little concerned before the talk that some people would be uncomfortable about the subject matter and not willing to talk. However, your calm and kind manner and just the right kind of probing questions, talking and sharing things about our experiences that we may not have talked about and the group really clicked from a way of thinking about what we've experienced and were relieved to see that which rather than the standard approach to a stroke clinic. Some of the group members were happy to be there with them doing so. I think it was a very successful session and the discussion was OK.

I would love to have you come again sometime and talk to our group who comes during the stroke rehab. I know that they have a lot to say on this subject and have some pretty sad tales to tell about what it's like since their stroke or heart that may or may not be founded and are preventing them from enjoying sex.

A special thank you for so generously giving of your time. It was much appreciated.
